Excludes delivery. Payment terms are T/T for domestic resin and LC at site for imported resin.

This week's executive summary

- PP market was sluggish this week due to weak demand. Part suppliers sold at a low price to boost deals and ease sales pressure, but this thin transaction. In addition, since the market had recovered slightly now, traders kept different views about the market, and most of the traders are waiting at sidelines.
- In domestic market, the supply of spot cargoes was reduced after part domestic producers had shutdown or lowered their operation rate, so offers this week were kept stable. Part dealers had no intention to lower their offer substantially to avoid losses. What's more, inventory pressure was slowly eased due to weak demand.
- As for import market, suppliers had lowered their offers for June and July shipment, and most importers were keeping at sidelines, with a low buying interest. In second-tier market, sellers lacked confidence to the prospect, mainly lowering their offers to boost deals.
- PP market might recover if oil price could jump next week.
